

## **FOR IMMEDIATE RELEASE**

### **SCREEN GP Americas and MCS, Inc. Host Joint Summer Open House Showcasing End-to-End Inkjet Mail Solutions**

**CHICAGO, IL – April 14, 2026** — Inkjet leaders SCREEN GP Americas and MCS, Inc. invite industry professionals to a joint open house at SCREEN’s demonstration facility in Elk Grove Village, Illinois, this summer. Across four one-day sessions—June 16, 17, 23, and 24, 2026—attendees will explore real-world, high-performance inkjet solutions for transactional and advertising mail manufacturing.

Featuring hands-on demonstrations and expert case studies, the event highlights collaborative technologies from industry partners, including:

- BlueCrest: Inserting and commingling solutions
- Ironsides: Production tracking
- Muller Martini, EMT, MBO, Standard Finishing, & Tecnav: Paper processing and converting solutions
- BCC Software: Postal data software
- Quadient: Document composition software
- MCS: Marketing mail inserting, transactional mail inserting, non-profit labels, and CMYK process color inkjet
- SCREEN: High-speed Roll-Fed Inkjet printing on TPJ 520NX, TPJ 520HD+ and TPJ 560HDX

“Our intention is to offer a real hands-on practical experience for our customers,” said David Loos, President of MCS, Inc.

“High-Speed Roll-fed Inkjet Printing provides the image quality, paper flexibility and most importantly the digital capabilities that today’s mail requires. It’s important we provide print providers the opportunity to see and explore these applications live and in action,” added Ken Ingram, President of SCREEN GP Americas.

Designed for executive leadership and operations management, the event will combine both hands-on “live” demonstrations of finished print products with professional networking opportunities. Space is limited and by invitation only. Interested parties should contact their SCREEN or MCS sales representative immediately to discuss attendance.

### **About MCS**

MCS provides professional mail manufacturing solutions, including high-speed inkjets, tracking solutions, and inserters to companies nationwide. With a focus on increasing mailer profitability, MCS remains a leader in industrial mailing technology. Learn more at [MCSPRO.COM](http://MCSPRO.COM).

### **About SCREEN Americas**

SCREEN Americas, a SCREEN Graphic Solutions group company established in 1967, is a leading provider of digital inkjet production technology serving the commercial, publishing, direct mail, transactional, prime and industrial label, paper pouch, folding carton, and flexible packaging industries. As the world's largest manufacturer of CTP devices, SCREEN also provides prepress and workflow solutions to further enhance and support print on demand, computer-to-plate production and high-speed variable data printing.
